STOP THE ARMS RACE
www.nonukesyall.org

Calling all South Carolina and Georgia Paddling Enthusiasts and Environmental Advocates to help stop the New Nuclear Arms Race!

PADDLE AND BOOGIE TO STOP THE BOMB

Augusta Canal and Mill Village Trailhead in Augusta, GA
March 28, 2026 | PADDLE 9AM-1PM | BOOGIE 1-5PM

In 1989, the only U.S. plutonium pit factory, Rocky Flats, near Denver, CO, was raided by the FBI and permanently shut down after contaminating the countryside with radioactive plutonium.

Now the U.S. proposes to build Rocky Flats at SRS. We have fought proposed plutonium pit factories at SRS four times in the past 30 years and won! We can Stop The Bomb NOW by stopping plutonium pits at SRS.

PADDLE AND BOOGIE TO STOP THE BOMB is a day of fun and music, education, and preparation to make our voices heard in opposition to new nuclear weapons manufacturing at the Savannah River Site.

PADDLE Join us on the Augusta Canal for an enjoyable 5.5-mile paddle starting from the head gate at Savannah Rapids Park in Martinez. Bring your own kayak or rent one from Savannah Rapids Kayak Rental. Mention the Paddle and Boogie for a discounted rental. Free shuttle back to the starting point if you rent from them or \$10 for your own boat. All paddlers must register and sign a waiver before embarking on the paddle.

BOOGIE The paddlers will disembark at Mill Village Trailhead on the Augusta Canal (109 Eve St.) and join the gathering for an afternoon of live solar-powered music headlined by Natti Love Joys, an open mike, and fun educational activities. Get informed about the the Plutonium Pit Production Facility proposed for Savannah River Site and upcoming public hearings and comment period expected in May/June.

STOP THE BOMB Every nuclear weapon contains a plutonium pit as its explosive core, and the U.S. has not mass produced them for almost four decades. The U.N. Treaty on the Prohibition of Nuclear Weapons outlaws the possession, manufacture, and use of nuclear weapons and is ratified by more than half of the nations of Planet Earth. The U.S. is currently squandering \$100,000 *per minute* on nuclear weapons, more than all other nations on Earth combined. The National Environmental Policy Act (NEPA) requires an Environmental Impact Statement to be published and public comments to be solicited for the public record. **We are being given no less than an historic national referendum on nuclear weapons!**

We don't need a New Nuclear Arms Race costing trillions of dollars to destroy everything we hold dear!

Banners, signs, and other artwork welcome!

Let's celebrate and activate to protect the Savannah River watershed and future generations!

Musicians, dancers, hikers, bikers, poets, dreamers and kite flyers, come one, come all, bring your family and friends!

YOUR HOSTS

Nuclear Watch South, SRS Watch, Georgia WAND, Savannah River Group of the Georgia Chapter of the Sierra Club, Carolina Peace Resource Center, Savannah Rapids Kayak Rental, and GRIP (Generational Radiation Impact Project)
